

# Communication at Gorsewood Primary School

## School Gateway

Any important text message is sent direct to your mobile phone. We also send emails. If you choose to download the App, school will not be charged for messages.

Payments and consent for trips and activities as well as all club bookings is also done through the gateway. You can download the App by searching for 'School Gateway' and allowing push notifications.

## School Website

The website can be found at <http://gorsewood.halton.sch.uk> You can find lots of useful parent information including newsletters, letters, term dates and club information. You can also see enrichment information such as information on visits, sports, drama and music.

All classes have a class page and a gallery. In order to access the class pages you will need to login however all other information is public.

## Marvellous Me

Class teachers use this App to send updates and messages on what children in their class have been doing.

## School Cloud

We use School Cloud for remote parent meetings including parents evening.

## Facebook

The main aim of the school Facebook page is as a 'broadcast' account. A one-way communication from the school to parents. A way to let you know about up and coming events and items of interest.

## Twitter

The purpose of Twitter is to share ideas, updates and information instantly. We often post updates from our school sporting events and visits. You can see our posts at @gorsewoodprimar

## Letters & Newsletters

We send all our letters out by email as well as a monthly newsletter. Paper copies are available if requested.

## Sims Parent Service

This enables you to conveniently access, review and request changes to the data held on you and your children direct from your phone.
